Associate

An Associate is responsible for client servicing which includes problem solving with the client, managing work flow and ensuring timely and good quality delivery to the client. He/She will be expected to perform the role onsite / offsite depending on the client requirement and will be required to work on a range of projects varying from business consulting to financial modeling.

For the successful execution of this role, an associate should have the following qualifications:

- Engineering graduates / B.Com / B.A Economics from premier colleges with prior work experience
- MBAs / Chartered Accountants / CFAs from premier colleges
- Very good problem solving skills and communication skills
- Sound knowledge of financial and capital market concepts (good to have for non relevant backgrounds like engineers)
- Knowledge of financial modeling /excel based modeling is a plus though not a necessity
- Most importantly never say die attitude and ability to work in teams
